C58

CAD computer-aided design

Index to Volume 13 Numbers 1–6, pages 1–400 ISSN 0010-4485

LIBRARY
FEB 25 1982
IOWA STATE UNIVERSITY
of Science & Technology

SUBJECT INDEX

A
A graph-to-layout correspondence in single-layer routing 73
A view of CAD/CAM 207
Allocation problem in building design 211

B
Bathroom design 137
Bézier points 365
Bézier's technique 133
Bibliography of applications of computer graphics to transportation planning and engineering problems 155

BOOKS AND PUBLICATIONS
Baron, R J and Shapiro, L G Data structures and their implementation 115
Bensasson, S Micros in construction 45
Bray, O H and Freeman, H A Data base computers 170
CAD/CAM international Delphi forecast 45
Clark, D R (ed) Computers for imagemaking 230
Deen, S M and Hammersley, P (eds) Proceedings of the international conference on databases 170
Delobel, C and Litwin, W (eds) Distributed data bases 171
Encarnacao (ed) Lecture notes in computer science: computer aided design modelling, systems engineering, CAD systems 229
Goos, G and Hartmanis, J Lecture notes in computer science: database techniques for pictorial applications 230
Faux, I D and Pratt M J Computational geometry for design and manufacture 48
Government response to ACARD report 166
Guedi, R A et al (eds) Methodology of interaction 231
Jones, J C Design methods: seeds of human futures 229
Laws, M and Thierauf, G Stabtragwerke, Matrizenmethoden der Statik und Dynamik 49
Mano, M M Digital logic and computer design 115
Newman, W M and Sproull, R F Principles of interactive computer graphics 229
Nicholson, H (ed) Modelling of dynamical systems 232
Paterson, J Architecture and the microprocessor 45
Reynolds, R A Computer methods for architects 45
Ryan, D L Computer-aided graphics and design 231
Smith, H T and Green, T R G Human interaction with computers 45
Taylor, R (ed) The computer in the school—tutor, tool, tutee 166
B-spline cubic curve 199
B-spline curves and surfaces 365
B-spline surfaces 145, 365
Building design 211, 327
Bulge, shear and squash: a representation for the general conic arc 81

C
CAAD 89
CAD of a low-temperature solar energy collector using interactive programming 85
COMPANY PROFILE
Genesys Limited 225
Computation methods for hydrodynamic problems (Reynolds' equation) 151
Computer graphics applications 155, 377
CONFERENCE REPORTS
CAD/CAM systems in mechanical engineering 221
CAM-i international spring seminar 302
Computer graphics '80 40
Computervision '81 164
Design automation conference 43, 384
Design: science : method 110
Engineering software II 222
Eurographics 80 42
Information technology for the eighties 306
Man and computers: partners in manufacturing 110
MICAD-80 41
Pet show 305
VLSI 81 386
Why can't we manage computer-aided
Why can't we manage computer-aided design? 112
17th Design automation conference 43
18th Design automation conference 384
Conic arc 81
Conics, B-spline curves 145
Cubic curve 199

D
DBMS for CAD/CAM systems 193
Drawing systems 351

F
Finite-element programs in integrated software for structural mechanics and CAD 27
Framed structures 261
Functional design of mechanisms 159

G
Generalized allocation problem in building design. Part 1: formulation 211
Generating the Bézier points of B-spline curves and surfaces 365
Geometry for CAAD 89

H
Hidden-line algorithm 19, 187
Hidden-line algorithm for scenes of high complexity 187
Hidden-surface elimination 99
Hydrodynamic problems 151

I
IGES 359
Interchanging spline curves using IGES 359

L
Line drawings 377
Low-frequency switching circuit model of a triac 7

M
Mathematical foundations of Bézier's technique 133
Multicriteria 339, 345
Multicriteria optimization 339

N
Nonlinear programming 317

O
Optimization see September and November issues
Optimization, simulation and multiple criteria in window design 345

Overhead transmission lines 265

P
Parametric cubic curve 199
PCBs 3, 367
Printed-circuit artwork 3
Prerouting analysis of printed circuit boards 367
Progress on drawing systems 351

R
Real-time hidden-surface elimination 99
Reynolds' equation 151
Routing 73

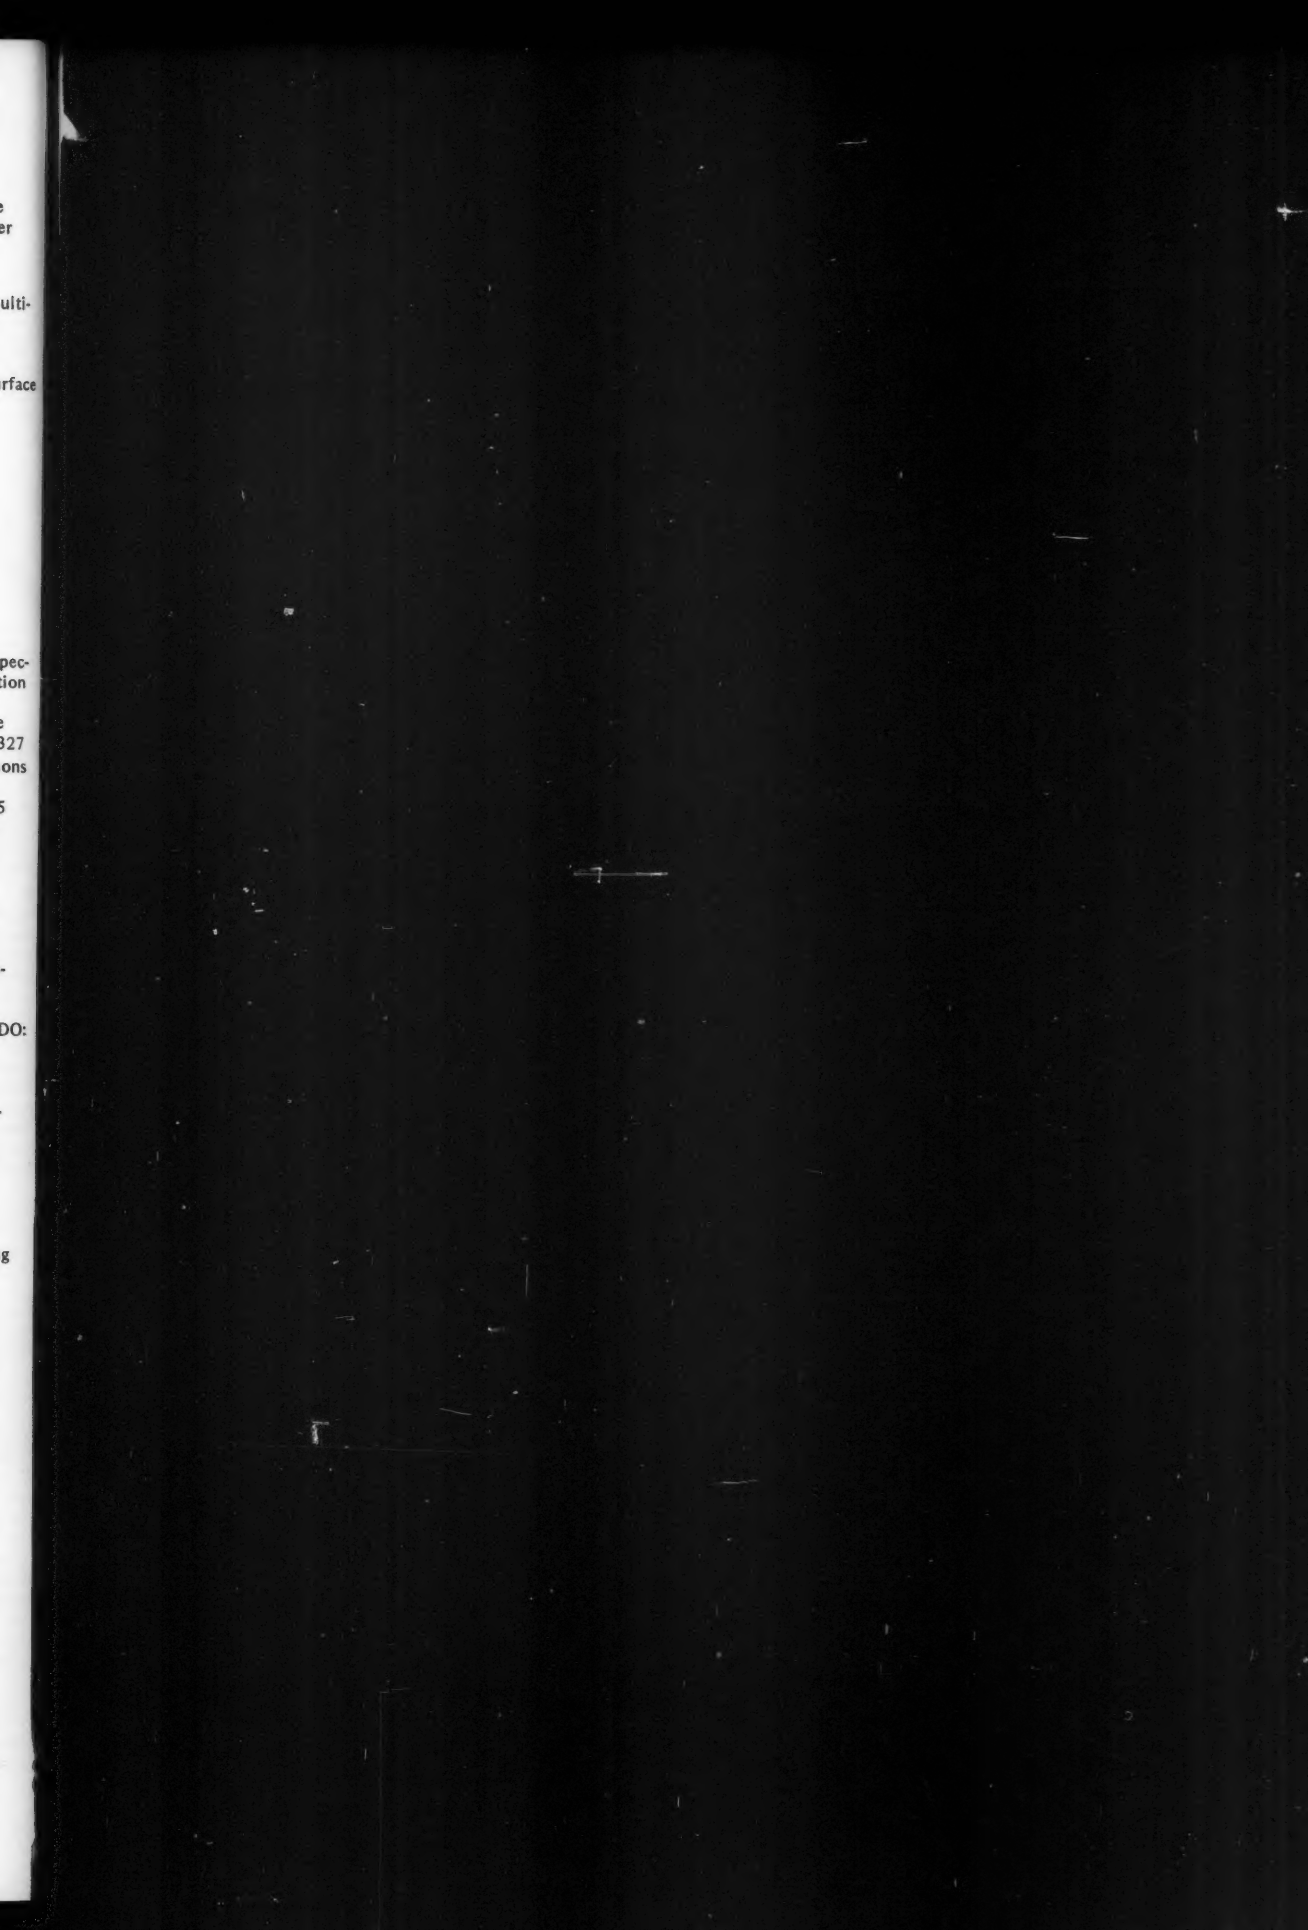
S
Shape classification of the parametric B-spline curve 199
Simulation 345
Solar energy collector 85
Some practical experiences in applying non-linear programming to CAD 317
SPA: automating bathroom design 137
Space planning 277
Spline curves 359
Structural mechanics 27

T
Tape-oriented hidden-line algorithm 19
TORNADO: a DBMS for CAD/CAM systems 193
Total verification of printed-circuit artwork 3
Transportation planning and engineering problems 155
Truss structures 253

U
Using axial dimensions to determine the proportions of line drawings in computer graphics 377

V
Verification of weight coefficients in multi-criteria optimization problems 339
View of CAD/CAM 207
VLSI circuits 99, 271
VLSI perspective of real-time hidden-surface elimination 99

W
Window design 345

AUTHOR INDEX


Arlani, G–A see Russell, A D 327
Auerbach, R A, Lin, B W and Elsayed, E A Layout aid for the design of VLSI circuits 271
Bartley, J see Phillips, R J 89
Beaumont, M J see Phillips, R J 89
Bézier, P A view of CAD/CAM 207
Bijl, A and Nash, J Progress on drawing systems 351
Boehm, W Generating the Bézier points of B-spline curves and surfaces 365
Buchanan, J T Generalized allocation problem in building design. Part 1: formulation 211
Carmichael, D G Probabilistic optimal design of framed structures 261
Chang, G and Wu, J Mathematical foundations of Béziers technique 133
Dekhtyarenko, V Verification of weight coefficients in multicriteria optimization problems 339
Elsayed, E A see Auerbach, R A 271
Fitzgerald, W J Using axial dimensions to determine proportions of line drawings in computer graphics 377
Fredriksson, B, Mackerle, J and Persson, B G A Finite-element programs in integrated software for structural mechanics and CAD 27
Galletti, C V and Giannotti E I Interactive computer system for the functional design of mechanisms 159
Ghani, S N Low-frequency switching circuit model of a triac 7
Giannotti, E I see Galletti, C V 159
Gossling, T H Bulge, shear and squash: a representation for the general conic arc 81
Griffiths, J G Tape-oriented hidden-line algorithm 19
Himmelblau, D M Some practical experiences in applying nonlinear programming to CAD 317
Kimura, T see Roman, G–C 99
Kirsch, U see Somekh, E 253
Lewis, J W Interchanging spline curves using IGES 359
Liggett, R S and Mitchell, W J Interactive graphic floor plan layout method 289
Liggett, R S and Mitchell, W J Optimal space planning in practice 277
Lin, B W see Auerbach, R A 271
Loh, R Convex B-spline surfaces 145
Mackerle, J see Fredriksson, B 27
Meen, S see Ulfsby, S 193
Mitchell, W J see Liggett, R S 277, 289
Nash, J see Bijl, A 351
Oian, J see Ulfsby, S 193
Olbrycht, L Algorithm for the design of overhead transmission lines 265
Persson, B G A see Fredriksson, B 27
Phillips, R J, Beaumont, M J, Richardson, D and Bartley, J Geometry for CAAD 89
Radford, A D Optimization, simulation and multiple criteria in window design 345
Richardson, D see Phillips, R J 89
Roman, G–C and Kimura, T VLSI perspective of real-time hidden-surface elimination 99
Russell, A D and Arlani, G–A Objective functions for optimal building design 327
Schneider, J B Bibliography of applications of computer graphics to transportation planning and engineering problems 155
Servit, M Prerouting analysis of printed circuit boards 367
Singhal, G C Computation methods for hydrodynamic problems (Reynolds' equation) 151
Somekh, E and Kirsch, U Interactive optimal design of truss structures 253
Szepienic, A A A graph-to-layout correspondence in single-layer routing 73
Toller, D R see Willey, D S 137
Ulfsby, S, Meen, S and Oian, J TORNADO: a DBMS for CAD/CAM systems 193
Wang, C Y Shape classification of the parametric B-spline curve 199
Ward, M A Total verification of printed-circuit artwork 3
Willey, D S and Toller, D R SPA: automating bathroom design 137
Wittram, M Hidden-line algorithm for scenes of high complexity 187
Wu, C CAD of a low-temperature solar energy collector interactive programming 85
Wu, J see Chang, G 133
